

張上元

#累積超過 100 個使用者深度訪談
#擔任實習生整理超過10萬筆公司資料
#舉辦活動吸引近2000人參與
#舉辦超過10場工作坊

學歷

國立清華大學(碩三)
藝術與設計所-設計組
班排:10.33%　GPA:4.20

國立雲林科技大學
創意生活設計系
系排:11%　GPA:3.92

在校表現

2026 臺大資料分析與決策社
2026 臺大管理顧問社
2026 **KEER** 感性工學與情感研討會
2026 **TAICHI** 人機互動研討會
2026 **Open HCI** 最佳應用 / 人氣獎
2026 發表 **HCI** 國際研討會
2025 清大資料科學社
2025 清大設計思考與數據分析社
2025 **TAICHI** 人機互動研討會
2025 **OpenHCI** 最佳互動獎
2025 發表 **HCI** 國際研討會
2024 清大管理顧問社
2024 發表 **HCI** 國際研討會
2023 發表視覺傳達設計國際研討會

專業技能

軟體開發: C#, .NET, React, Git
資料分析: Python, Power BI, Excel, SQL
設計工具: Adobe Creative Cloud
UX: 易用性測試、深度訪談、問卷調查

/ 實習經驗 /

羅技電子股份有限公司　2025/3~迄今

Innovation & Scenario Lab, Taiwan innovation

1.實習期間與各部門高階主管共同制定年度創新題目，使專案緊扣公司未來一年重點發展方向；舉辦梅竹黑客松、MakeNTU、Logi 黑客松、Epoch Garage+ 等 4 項創新競賽與新創合作專案，於 **NT$120 萬總預算與每 3 個月里程碑週期內準時交付。**提供 Action / Webcam SDK 降低開發門檻，並管理利害關係人、整合 IT、產品線 BG、設計、行銷與機電等跨部門人力。四場專案累積最終吸引 50+ 支團隊、300+ 名羅技員工、台清交學生投入，產出 **100+ 個以使用者為中心的創新概念與 PoC 原型**，其中 2 項硬體概念（滑鼠、鍵盤）推進至 **NPI** 新產品導入流程。
2.將一次性活動產出的創新概念轉化為可重複使用的決策資產：開發部門網站（累計 1,000+ 次內部瀏覽）彙整所有 Demo 成果，並導入 NotebookLM 建置 Innovation RAG 創新知識庫檢索。每半年將概念收斂為主題式洞察，**主導 3+ 場 Future Design 工作坊**（Manager 層級參與），以 AI 共創方式提供公司中長期產品創新方向策略。

台灣設計研究院　2025/1~2025/2

前瞻研發組 設計研究實習生 (該屆錄取率:2.89%)

1.洞察國際前瞻趨勢與產業發展:**2個月內研究超過30篇**智慧醫療與設計科技文獻，研究10項前瞻議題、舉辦專家座談會與分析訪談內容，提出關鍵前瞻趨勢與國際市場需求。

台灣微軟股份有限公司　2022/7~2023/6

終端夥伴暨解決方案業務事業群 行銷實習生

協助行銷、業務與客戶經理，負責 Windows、Office 2021、Microsoft 365 產品
1.銷售數據分析與決策:以 Excel 清洗並整理超過 10 萬筆電腦銷售數據，建立 Power BI 儀表板，呈現 OEM 與通路 SKU 之 MoM / QoQ 銷售情況。產出洞察提供給 Sales 與 Account Manager 為下半年預算配置決策依據。
2.與 Intel 及經銷夥伴共同推廣 Windows 裝置，於 2 場實體 Roadshow 與 Intel 發表會（**累計 110+ 位參與者**），面向消費者介紹 Windows 11、Office 2021、Microsoft 365。推廣微軟零售通路講師專屬平台 ExpertZone，提升平台於通路端之觸及率。

/ 社團專案 /

先行智庫-實體金融組專案　2025/9~2026/1

1.分析金融與 FinTech 產業中 AI 與 RPA 的導入比例、投資規模與產值變化趨勢，依業務流程與細分領域歸納 AI 應用案例與效益指標，繪製產業應用藍圖；並以事件研究法分析 6 家國外金融機構的 AI 導入案例，提出技術應用比較與策略建議。

烘焙找材料-實體數據分析專案　2025/9~2026/1

1.以提升整體營收與行銷效率為目標，**分析超過8萬筆電商平台與線上課程銷售數據，運用 RFM模型進行客戶分群**，整合電商平台與線上課程數據洞見，針對不同客群提出 8 種客製化行銷策略。

/ 創域研究室 F&W Lab | 指導教授：董芳武 /　2024/9~迄今

碩士論文 | AI 應用於數位健身產品研究—以健身 App 為例
1.透過量化、質性兩階段研究法，探索使用者對 AI 功能的想像與期待：先以 **Kano 模型問卷**（回收 328 份）建立功能優先序，再主導 4 場 **AI 共創工作坊結合焦點團體法**（共 26 位參與者），釐清使用情境與痛點並共同發想產品概念；依設計思考流程將研究洞見轉化為 AI 導入的設計建議方向。

EDUCATION

National Tsing Hua University (NTHU), Hsinchu, Taiwan *Sep. 2024 - Present*

- Master's degree:Major in Arts and Design, GPA 4.20 / Class ranking: Top 10.33%

National Yunlin University of Science and Technology (NYUST), Yunlin, Taiwan *Sep. 2019 - Jun. 2023*

- Bachelor's degree: Creative Design, GPA 3.92 / Department ranking: Top 11%

INTERNSHIP EXPERIENCE

Logitech, Hsinchu, Taiwan *Mar. 2025 - Present*

Taiwan Innovation Intern, Innovation & Scenario Lab

- Worked with department Heads to co-define the annual innovation challenges, tying every program to the company's one-year strategic priorities; ran 4 innovation and startup-collaboration programs (Mei-Chu Hackathon, MakeNTU, Logi Hackathon, Epoch Garage+) on 3-month milestone cycles, all delivered on time within a NT$1.2M budget. Provided Action / Webcam SDKs to lower the prototyping barrier and managed stakeholders across IT, product-line Business Groups (BG), Design, Marketing, and Mechatronics , attracting 50+ teams and 300+ participants to produce 100+ consumer-centric innovation concepts and PoC prototypes. Two hardware concepts (mouse, keyboard) advanced into the NPI process.
- Innovation knowledge system & product direction: Converted one-off event output into a reusable decision asset by building a department website (1,000+ internal views) that consolidates all demo concepts and deploying NotebookLM as an Innovation RAG knowledge base. Distilled concepts into thematic insights every six months and led 3+ Future Design workshops with manager-level stakeholders, using AI co-creation to inform the company's mid-to-long-term product innovation strategy.

Taiwan Design Research Institute, Taipei, Taiwan *Jan. 2025 - Feb. 2025*

Design Research Intern, Strategic Foresight Research & Development Section

- Conducted a literature review of 30+ academic papers on smart healthcare and design-technology convergence across 10 emerging technology topics; organized expert panel discussions and analyzed interview transcripts, synthesizing findings into foresight trends and international market opportunities.

Microsoft, Taipei, Taiwan *Jul. 2022 - Jun. 2023*

Marketing Operation Intern, Device Partner Solution Sales

- Sales Analytics & Decision Support: Cleaned and structured 100,000+ PC sales records in Excel, then built interactive Power BI dashboards surfacing MoM and QoQ performance across OEM and channel SKUs; delivered the insights Sales and Account Managers used to set second-half budget allocation.
- Product Marketing & Channel Enablement: Co-marketed Windows devices with Intel and channel resellers, presenting Windows 11, Office 2021, and Microsoft 365 directly to consumers across 2 Roadshows and an Intel launch event, reaching 110+ attendees; drove adoption of ExpertZone, Microsoft's platform for retail channel trainers, expanding platform reach across the reseller network.

PROJECTS

KSC Thinktank｜Industry Analyst, Financial Services Group *Sep. 2025 - Jan. 2026*

- Quantified AI and RPA adoption rates, investment scale, and output-value trends across financial services and FinTech; synthesized AI use cases and benefit metrics by business process and sub-sector into an industry application roadmap; applied the event study method to 6 international financial institutions' AI adoption cases, delivering a comparative technology assessment and strategic recommendations.

Hey Baker｜E-Commerce Data Analytics *Sep. 2025 - Jan. 2026*

- Analyzed 80,000+ sales records across a baking-supplies e-commerce platform and online course business to improve revenue and marketing efficiency; applied RFM modeling to segment customers, integrated cross-channel data insights, and proposed 8 tailored marketing strategies by segment, targeting higher customer lifetime value (CLV) and long-term market share.

RESEARCH EXPERIENCE

Field & Wonder Lab (F&W Lab), NTHU | Advisor: Prof. Fang-Wu Tung *Sep. 2024 - Present*

- Master's Thesis｜AI in Digital Fitness Products: A Fitness App Case Study
  Led a two-phase study (quantitative then qualitative) mapping how users envision and expect AI features: fielded a Kano-model survey (328 responses) to establish feature priority, then facilitated 4 AI co-creation workshops run as focus groups (26 participants) to surface usage contexts and pain points while co-generating product concepts; translated findings into AI integration design recommendations through a design-thinking process.

PUBLICATIONS & SKILLS

- **Publications:** HCI International (2024, 2025, 2026), TAICHI (2025, 2026), KEER (2026)
- **Skills** : UX Research : Usability testing, Field studies, Focus groups, Eyetracking, Card sorting, A/B testing, Surveys
  Data & Analytics : Python, SQL, Power BI, Excel Software Development : C#, .NET, React, HTML/CSS/JavaScript, Git
  Design : Figma, Adobe Illustrator, Photoshop, Rhino

Application for Product Experience Planner

Dear Hiring Manager,

I am Shang-Yuan Chang, a master's student at National Tsing Hua University's Graduate Institute of Arts and Design, currently an Innovation Intern at Logitech's Innovation & Scenario Lab and a member of National Taiwan University's Data Analytics Club and Consulting Club. Over the past year and a half, my work has looked a great deal like what this role describes: turning user insights and AI technology into innovative experience concepts, building PoC prototypes, and moving those concepts into the product pipeline. I would like to do that work at HP

From Concept Incubation to Product Introduction

At Logitech, I run 0-to-1 concept hackathons and consolidate the output of separate events into one body of work. I co-define the annual innovation challenge statements with department Heads so every topic maps to the company's priorities for the coming year, and I lead four innovation and startup-collaboration programs (Mei-Chu Hackathon, MakeNTU, Logi Hackathon, and Epoch Garage+), delivering all of them on schedule within a NT$1.2M budget on three-month milestone cycles while coordinating resources across IT, product-line Business Groups (BG), Design, Marketing, and Mechatronics. Together these programs drew 50+ teams and 300+ participants and produced 100+ consumer-centered concepts and PoC prototypes, two of which, a mouse and a keyboard, were selected to advance into the NPI (New Product Introduction) process. I have also worked to make that output reusable rather than one-off: I built a department web portal consolidating all demo results, deployed NotebookLM as an Innovation RAG retrieval layer, and distilled concepts into thematic insights every six months, leading 3+ Future Design workshops with manager-level stakeholders.

Software Development Experience (Claude code)

Beyond running programs, I take part in concept validation on the product side. I use Logitech's SDK for front-end and back-end PoC development and validate software-hardware integration feasibility through Logitech Options+ and G HUB. I have run user testing on ergonomic headsets, gaming keyboards, business mice, laser presenters, and Bluetooth speakers, giving iteration feedback not only on the experience flow but also on CMF and actuation feel (haptic feedback, magnetic switch travel depth) for gaming use cases. That work taught me one thing: for an experience concept to ship, you have to speak the user's language and the engineer's language at the same time.

Research Method Is My Foundation

My methodological training comes from Professor Fang-Wu Tung's lab. My master's thesis used a two-phase design, quantitative first and then qualitative depth, to examine what users expect from AI features: a Kano-model survey (328 responses) established feature priority, then I facilitated 4 AI co-creation workshops run as focus groups (26 participants) to clarify usage contexts and pain points while co-generating concepts, and translated those insights into design recommendations through a design-thinking process. In a separate study on how generative AI is reshaping design workflows, I collected first-hand workflow data through diary studies and in-depth interviews, then validated the findings in workshops. This work has been presented at HCI International (2024, 2025, 2026), TAICHI, and KEER. I also interned with the Foresight R&D division at the Taiwan Design Research Institute (a 2.89% acceptance rate that year), where I completed a literature review of 30+ papers on smart healthcare and design technology, researched 10 foresight topics, and organized an expert forum synthesizing international market needs.

Why HP

During my internship with Microsoft's DPSS division, I cleaned and analyzed more than 100,000 OEM PC sales records, including HP's, and built Power BI dashboards that sales and account managers used as the basis for budget allocation decisions. I also worked with Intel and channel partners to promote Windows devices to consumers. At Logitech I sit on the peripherals side, watching how people actually operate these products. Logitech is also a multinational environment, so cross-functional, cross-time-zone collaboration and working in English are already familiar to me, and I expect to get up to speed quickly.

The Product Experience Planner role is where my graduate training and three internships come together. For the past year and a half, incubating concepts, building PoC prototypes, facilitating ideation, coordinating engineering with external vendors, and delivering against lifecycle milestones have been my daily work, and I would like to bring that to the products consumers actually hold. I would welcome the opportunity to discuss it with you.

Sincerely,
Shang-Yuan Chang
